

Ezra Desmond Sutanto

Informatics Student | AI & Full-Stack Builder

About Me

Informatics student and full-stack builder experienced in developing web applications, operational tools, and data-assisted workflows for commercial clients and university organizations. I have worked across product design, frontend and backend development, databases, deployment, and live event operations. My projects include an automotive commerce website, a registration platform serving hundreds of participants, and a smart tailor-allocation system. I enjoy turning complex operational problems into practical, maintainable software.

Skills

- **Programming**
Python · TypeScript · JavaScript · PHP · SQL
- **Frontend & Mobile**
Next.js · React · Astro.js · React Native · Expo · Tailwind CSS
- **Backend & Database**
Laravel · FastAPI · Supabase · MySQL · PostgreSQL · SQLite · REST APIs
- **AI, Data & Automation**
Scikit-Learn · TensorFlow · Pandas · NumPy · Gemini API · OpenRouter API · n8n · Hermes
- **Tools**
Git · Docker · Figma · Odoo ERP · Streamlit

Education

- **(2024 – Present)**
PETRA CHRISTIAN UNIVERSITY
Bachelor of Informatics
3.76/4.00
- **(2021 – 2024)**
SMA KRISTEN PETRA 2
Natural Science

Project Experience

- **TOKOKARET.COM — AUTOMOTIVE COMMERCE WEBSITE**
Solo Developer · Commercial Client | 2026
 - Built an automotive product website for a marketplace seller with 4,000+ customers and approximately 50,000 items sold.
 - Developed a rule-based product-selection assistant using Astro and Tailwind CSS.Live: tokokaret.com
- **INNOFASHIONSHOW 7→8 — EVENT & COMPETITION PLATFORM**
IT Coordinator & Full-Stack Developer · PCU | 2024–2026
 - Led a registration platform handling 302 competition registrations, 284 approved participants, and 212 event participants.
 - Implemented QR ticketing, authentication, admin dashboards, participant management, and event-day check-ins.Live: innofashionshow.petra.ac.id
- **TAILOR SMART-ALLOCATION & KOPERASI MANAGEMENT SYSTEM**
Machine Learning Engineer & Full-Stack Developer · Group Project | January 2026
 - Personally developed the smart tailor-allocation workflow and operational dashboards using Python, Streamlit, and SQLite.
 - Created user personas, user journeys, value propositions, and product-design documentation.
 - Built the Tailor efficiency prediction with Unsupervised Learning featuring clustering.
- **SERVISIN — ELECTRONICS REPAIR SERVICE MARKETPLACE PLATFORM**
Full-Stack Developer & Product Designer · Group Project | March–June 2026
 - Developed a mobile marketplace connecting customers with electronics repair technicians.
 - Contributed to its booking flow, Laravel API, MySQL database, product research, and interface design.
- **AKUN.AI — AI-ASSISTED ACCOUNTING SAAS PLATFORM**
Full-Stack Developer & Product Builder · Solo Project | June 2026
 - Developed an OCR-based prototype for extracting structured data from financial documents.
 - Designed its authentication, product flows, interface, and Mayar billing concept.

Honors & Awards

● 2ND PLACE — SUTD × PCU INTERNATIONAL HACKATHON

Singapore University of Technology and Design × Petra Christian University | January 2026

Built an ML workforce-efficiency prediction system using real cooperative operational data.

● 1ST PLACE — FESTIVAL BAND PELAJAR, SENIOR HIGH SCHOOL CATEGORY

Festival Band Pelajar Surabaya PDAM | May 2024

Won as part of D'vacto Band through a collaborative live performance.

● 1ST PLACE — SMA AWARDS SHORT MOVIE COMPETITION

SMA Awards Jawa Pos | 2023

Contributed to audio engineering, filming, and video editing for a winning short-film production.

● 1ST PLACE — ETERNITY BUSINESS RALLY GAMES COMPETITION

ETERNITY Universitas Ciputra | 2023

Won a business-strategy competition involving teamwork, problem-solving, and decision-making.

Work Experience

● FREELANCE FULL-STACK DEVELOPER

Self-Employed | June 2025–Present

- Developed and deployed web platforms for commercial and organizational clients using Next.js, Astro.js, Laravel, MySQL, and AI APIs.
- Delivered customer-facing websites, secure authentication systems, admin dashboards, databases, and workflow automation.
- Translated client requirements and domain knowledge into usable digital products.

● ASSISTANT LECTURER

Informatics Department, Petra Christian University | February 2025–Present

- Supported lecturers in delivering programming, algorithms, and statistics-related course materials.
- Guided students in programming logic, problem-solving, and assignment implementation.

● PRIVATE GUITAR TUTOR

Self-Employed | September 2025–Present

- Designed a structured acoustic and electric guitar curriculum for students with different learning goals and experience levels.
- Adapted teaching methods to individual learning pace while covering rhythm, chords, scales, technique, and music theory.
- Developed communication, mentoring, and learning-design skills through personalized instruction.

Organizational Experience

● IT COORDINATOR — INNOFASHIONSHOW 8

Petra Christian University | November 2025–Present

- Led technical direction of a live event platform supporting 200+ participants — architecture, development, deployment, and live reliability.
- Progressed from frontend contributor (InnofashionShow 7) to IT Coordinator (InnofashionShow 8), owning the full technical stack.

● CHAIRMAN — INVESTALK 2026 PCU TALKSHOW

Petra Christian University | December 2025–May 2026

- Led a university-scale financial literacy event attended by 150+ participants.
- Coordinated the committee, event operations, speakers, logistics, and participant experience.
- Collaborated with an investment content creator with 300,000+ subscribers and a Certified Financial Planner.

● SECRETARY & TREASURER — DIGICOMP 2026 NATIONAL UI/UX COMPETITION

Petra Christian University | February–June 2026

- Managed budgeting, expense records, reimbursements, financial reporting, and administrative documentation for a UI/UX competition.
- Prepared official letters and coordinated administrative requirements across event divisions.
- Supervised and coordinated the Event, Equipment, and IT divisions.
